## Market Comment

6.21 Mnkg of tea were on offer at this weeks Colombo Tea Auction 2.75 Mnkg were Low Grown Main Grades and 2.16 Mnkg were High and Mid Grown Main Grades.

Low Grown met with less demand. A few BOP1 / OP1s were dearer, others were firm. OP / OPAs were marginally lower all-round. Pekoe's sold at lower rates, whilst Pekoe1's were firm on last week's levels. In the Tippy Small leaf catalogues select best FBOP1s sold at lower rates, whilst others were firm on last. Well-made FBOPs and below best varieties sold at lower rates; others appreciated in value. Select best and best FBOPF1s sold at lower rates; others were firm to dearer. FBOPFs met with less demand all-round. Well-made BOP / BOPFs sold at lower rates, whilst others were firm on last. In the Premium Flowery catalogues long leaf and small leaf tippy teas appreciated in value.

There was fair general demand in the Ex-Estate catalogues. A selection of better Western BOPs moved up Rs. 10 to Rs. 20 following special inquiry; other high priced teas declined in value; others were irregularly lower. Select best BOPFs dearer upto Rs. 20; other better teas were about firm; some below best types gained Rs. 10 to Rs. 20; plainer teas with poorer leaf declined Rs. 10 to Rs. 20; others were firm. Nuwara Eliya BOP / BOPFs were irregularly lower. Udupussellawa BOPs were firm. Brighter BOPFs gained Rs. 10 to Rs. 20. Best seasonal Uva BOPs sharply dearer on special inquiry; some below best teas dearer Rs. 10 to Rs. 20; others were firm. Better BOPFs gained Rs. 10 to Rs. 20; others were firm. Select stylish Medium BOPs were firm; others were lower. BOPFs were dearer Rs. 20. Select best CTC BP1s were firm; others were irregularly lower. Better PF1s were firm to Rs. 10 dearer; below best were irregularly lower Rs. 10 to Rs. 20; others declined Rs. 10.

### Mid-year Summary for China's Tea Trade 2020

For the first half of 2020, companies in different fields across the world have experienced trials and tribulations due to Covid-19 pandemic. It's also been a very unusual half year for China's tea trade with fluctuating monthly exports. From March to April, the overall exporting situation has improved as the situation of the pandemic in China has turned for the better and companies have fully resumed work so that the order backlog could be fast executed.

### Export

The amount of monthly exports for the first half of 2020 has experienced an increase in the first place and then a decrease and the total exports registered at 176,000 tons, down by 1.7% compared with the same period last year.

Unlike the amount of exports, the average price was satisfactory, registering at USD 5.65/kg, up by 9.52% compared with the corresponding period last year, which made the export value rise up to USD 990 million for the first half of 2020, an increase of 7.7% compared with the same period last year.

The export value for every type of tea in the same time frame experienced an increase and Pu'er tea has emerged as a not able one that was previously not in a great demand on the international market. According to the customs, the details of export for each type of tea are as follows:

China exported 148,000 tons of **green tea**, valued at USD 630 million, down by 0.3% and up by 1.5% respectively compared with the same period last year; For **black tea**, it's 14,000 tons, valued at USD 170 million, down by 16.1% and up by 18.4% respectively compared with the same period last year; For **Oolong tea**, it's 9,087 tons, valued at USD 110 million, down by 0.6% and up by 2.2% respectively compared with the same period last year; For **scented tea**, it's 3,092 tons, valued at USD 32.36 million, up by 1.6% and 13.5% respectively compared with the same period last year; For **Pu'er tea**, it's 1,465 tons, valued at USD 43.58 million, up by 16.5% and 203.9% respectively compared with the same period last year.

If we look at the main export markets, China exported 40,000 tons to Morocco, 12,000 tons to Uzbekistan, 8,594 tons to Ghana, 8,104 tons to Togo, 7,735 tons to Russia, 7,528 tons to Cameroon, 6,519 tons to Japan. For America and Germany, it's 4,976 tons and 3,539 tons, down by 33.4% and 33% respectively compared with the same period last year. Terrible pandemic situation, jammed logistics, volatile demand and imposed cargo control measures are the main factors affecting the shipment or the contraction of new orders.

**Import** - Compared with the situation of export, the pandemic has dealt a heavier blow to import. From 2017 to 2019, China's tea imports had seen explosive growth and then it declined dramatically in both price and volume during the first half of 2020 because of the pandemic. According to the customs, from January to June of 2020, China imported 17,000 tons, valued at USD 71.6 million, down by 7.3% and 20.8% respectively compared with the same period last year. The average price was USD 4.21/Kg. China mainly imported teas from Sri Lanka and India. During the pandemic, China's tea imports from the two countries have notably shrunk with 5,328 tons from Sri Lanka and 4,122 tons from India, down by 19.1% and 19% respectively compared with the same period last year. For the first half of 2020, the import value was down across all types of tea, with Pu'er tea being the most notable one, falling by over 68%. According to the customs, the details are as follows,

China imported 14,000 tons of **black tea**, valued at USD 51.82 million, down by 10.4% and 12.4% respectively compared with the same period last year; For **green tea**, it's 2,022 tons, valued at USD 7.13 million, up by 23.5% and down by 18.7% respectively compared with the same period last year; For **Oolong tea**, it's 1,013 tons, valued at USD 10.9 million, down by 21.4% and 43.7% respectively compared with the same period last year;

For **Scented tea**, it's 335 tons, valued at USD 1.26 million, up by 71.3% and down by 29.9% respectively compared with the same period last year; For **Mate tea**, it's 42 tons, valued at USD 0.17 million, down by 32.4% and 24.9% respectively compared with the same period last year; For **Pu'er tea**, it's 45 tons, valued at USD 0.33 million, up by 30.6% and down by 68.8% respectively compared with the same period last year.

If we look at the big picture, China's tea trade has under gone an unprecedented severe test amidst the spread of the coronavirus and the declining of economies around the world. However, the pandemic has raised the public awareness of health, providing more possibility to boost the global demand for tea and create new trade opportunities.

### Sri Lanka July 2020 Tea Crop up on last year

For the first time this year monthly tea production rose above the previous year's quantity. The figure of 26.2 Mnkg recorded in July is up on last year's figure of 25.9 Mnkg and is the highest since 2015.

YoY gains came from the higher elevations. High Grown were up 9% from 5.3 Mnkg to 5.8 Mnkg this year. Mediums moved up 7% from 3.9 Mnkg to 4.2 Mnkg. This year's Mid Grown figure is at a ten year high. Back in 2010 4.5 Mnkg was recorded, since then Mid Country production has been under 4 Mnkg in the month of July.

Production for the year has reached 156.37 Mnkg and is still 28.5 Mnkg (-15%) lower than last year's figure of 184.8 Mnkg. Though all three elevations are down YoY, 24 Mnkg of the 28.5 Mnkg or 84% of the crop loss has come from the Low country.
